This is a rough outline of how I expect to execute my semester project. The research phase has started, alongside writing this schedule document / gantt-chart, but given the fact that we have summer vacation smack dab in the middle I must admit I've been quite relaxed thus far. The timing was very nice, as I'm in the process of moving into a new apartment, so having the freedom to catch up a bit later couldn't be resisted. That being said, I've read the semester project delivery brief, read the filler text and viewed the images, so I've got some design ideas brewing, though not formalized. For now, the my research has been looking at some museum web pages online (not just scientific) and planning some image editing.

I also tried my hand at making the gantt-chart in Excel, feedback welcomed.

Have a great summer!  
Kristian
